Matt Crape

Senior Technical
Product Marketer
Veeam

Agenda

- Speaker introductions
- The path that brought us here
- When opportunity knocks
- How Veeam has broadened our skill sets
- What paths could you choose
- Your turn

The path that brought us here

Veeam® and especially their community programs (Veeam Vanguard & Veeam Legend) enabled me to get in touch with like-minded people to exchange deep technical information about all "the Veeam things" and I enjoy every bit of it !

Falko Banaszak - Solution Architect & Consultant for Data Protection at SVA Germany GmbH

I Don't Do If's Buts and Maybes, I Do Absolutes

When opportunity knocks

"Veeam and the Vanguard program has led me to write three books and allowed me to meet so many new people within the community expanding my career in so many ways."

Chris Childerhose - Lead Infrastructure Architect at ThinkOn

How Veeam has broadened our skillsets

"My current role and wouldn't happen without Veeam, it's commitment to the tech community and the Vanguard program. The knowledge gained and connections, both professional and personal, have enriched both my career and my personal life."

Jim Jones - Senior Product Infrastructure Architect at 11:11 Systems

What path could you choose

"Veeam and the VV program have accelerated my career to another level, and it all started at VeeamON 2019, my first speaking engagement. Forever thankful!"

Al Rasheed - Technical Account Manager at VMware

Your turn

"The opportunities to present feedback and contribute to the Veeam product family, afforded to me as part of the Veeam Vanguard program since 2015, has opened career paths I would never normally have explored. I simply would not be where I am today without those opportunities"

Craig Dalrymple - Inside Solutions Architect at 11:11 Systems
